

Reinforced Gabion

Reinforced Gabion:

1. Flexible and solid structure;
2. High tensile strength and no belly;
3. Good permeability used for retaining wall;
4. Easy to install;
5. Cost-effective and durable;
6. Environmentally friendly;
7. Retaining wall, reinforced banks;
8. Serve in erosion control and reinforced slope systems, roadworks, railway, constructions;
9. Road mesh

Reinforced Gabion					
Wire Dia mm	Hole Size mm	Height m	Reinforced Wire Dia mm	Width m	Length m
2.0-4.0	60*80 80*100	0.3-2.0	3.0-4.4	2.0	20
				3.0	30
				4.0	50
