

Rockfall Protection Netting

Rockfall Protection Netting

1. Long service time up to many years
2. Stable quality and good performance.
3. Reduce sediment concentration and keep soil surface stable
4. Good performance in strength tensile
5. Easy to install and transport
6. The rock fall protection nettings are used to prevent small size boulders or rocks from falling in road ways, the mine, the water and electricity project, the tourist site, the river course and in the municipal engineering.

horizontal reinforced steel rope(6-8mm)

vertical reinforced steel rope (6-8mm)

Protection Netting					
Item 1	Mesh size (mm)	Wire thickness (mm)	Width (m)	Length(m)	
Gabion Mesh	80X100	2.0-3.0	2	25/50	
Item 2	Wire Diameter (mm)	Reinforcement direction	Structure	Tension strength	Breaking load of rope
Steel rope	6-8	Longitudinal or transverse	6X36IWRC	Max 2160N/MM2	50KN
